

REMARKS

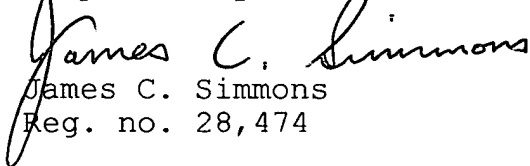

In addition to a paragraph claiming priority of the parent application, the specification has been amended similarly as amended in the parent application.

Claim 19 has been amended to more clearly define what Applicant regards as the invention, and claim 20 has been amended to conform. The amended language in claims 19 and 20 finds support similarly as similar language in claim 1, as amended, in the parent application finds support.

Claims 21 to 33, dependent on claim 19, are newly submitted with this Amendment. Support for the recitations of newly submitted claims 23 and 24 is found in the next to last paragraph on page 8 of the specification. Support for the remaining newly submitted claims may be found in the claims as originally filed, with amendments similar to corresponding amendments in the parent application.

It is respectfully submitted that the claims, as amended and as newly submitted, are patentably distinguishable over the art of record (art cited and disclosed in the parent application). It is accordingly submitted that this application is in condition for allowance, and such is respectfully requested.

Respectfully submitted,

James C. Simmons
